SendGrid Documentation / For Developers / Sending Email / v3 API Python Code Example

## v3 API Python Code Example

We recommend using SendGrid Python, our client library, [available on GitHub](#), with full documentation.

Do you have an [API Key](#) yet? If not, go get one. You're going to need it to integrate!

### Using SendGrid's Python Library

```
1 # using SendGrid's Python Library
2 # https://github.com/sendgrid/sendgrid-python
3 import os
4 from sendgrid import SendGridAPIClient
5 from sendgrid.helpers.mail import Mail
```
